Sir:

Prior to examination, applicants would like to comment on the filing of the present application. The present application is a continuation-in-part of U.S. Application Serial No. 644,473, filed August 27, 1984, all pending claims of which have been indicated to be allowable by the Examiner. The pending claims in the parent application are directed to the multi-sub-unit chimeric receptor (Claims 1-13 of the present application).

Claim 1 of the present application is identical to Claim 1 as originally presented in the parent application. Accordingly, the claims of the present application should be equally allowable. There are some differences in the dependent claims. Additional examples have been set forth in the specification and slight changes have been made to the wording of the specification for clarity. All claims are within the scope of the originally filed claim in the parent application.

As many of the issues have been resolved in the parent application, it is suggested that the Examiner telephone applicants' representative in order to expedite prosecution in the event that the Examiner assigned to this application has the same objections made in the parent case.

Respectfully submitted,
